Build Your Camera Business in Cloud Environment with

EpiCAMERA

EpiCamera is a Cloud Surveillance Solution that provides hosting and storage services for easy viewing of the captured images of your IP or web-based cameras installed at your monitored site(s) for instant viewing from anywhere, anytime.

With the convenience and affordability of IP cameras and web cameras installations these days, EpiCamera foresees the rise in its deployment in offices and homes for surveillance and security. Tapping on the opportunity, EpiCamera is pleased to be offering storage space for captured images of events on a remote location instead of in a DVR or in a local computer for added security and convenience.

A report released in September 2013 by IMS Research, an IHS company, stating that "The world market for video surveillance as a service (VSaaS) is predicted to have an average annual growth of 17% from 2012 to 2017, achieving nearly to US$1.3 billion by 2017". At the same time, cloud-based video surveillance solutions used in global SME installations is forecasted to be worth US$100 million in 2016.

EpiCamera Cloud Surveillance Solution is the preferred choice for those who want to build their camera business into the future. Offer EpiCamera as an option of storage solution to your clientele, emphasizing on its scalability, security and convenience. When the whole world is moving towards cloud, your business shouldn't be left behind.

RESELLER BENEFITS
